---

## SUMMARY

Backend engineer and technical leader with over a decade of experience building and maintaining production systems. Strong track record in API design, database architecture and system reliability.

Combines hands-on development with leadership: technical decisions, team coordination and knowledge transfer. Experience in education and digital projects reinforces communication and mentoring skills. Based in Rio de Janeiro, Brazil.

## EDUCATION

### Extension Course in Programming

ORT Institute of Technology (2012)

---

### Leadership and Education Program

Machon leMadrachim – Jerusalem (2014)

Part of Shnat Hachshará Youth Program; courses in Oratory, Decision Making and Leadership Techniques.

---

### Bachelor in Information Systems

Federal University of the State of Rio de Janeiro - UNIRIO (2019)

Focus on modeling, development and management of modern Information Systems.

---

### Postgraduate degree in Education and Psychopedagogy

UniBF (2023)

## PROFESSIONAL EXPERIENCE — TECHNOLOGY

### Backend Engineer

Meetal · 2025 – present

- Develop and maintain backend services for an ERP platform in production with active clients.
- Responsible for database schema maintenance, implementation of new features and integration with external APIs.
- Analyze system performance, identifying bottlenecks in high-usage flows and optimizing critical operations.
- Participate in architectural discussions and backend evolution to support increasing system complexity.
- Work with Python, FastAPI, Alembic, AWS Lambda, API Gateway and DynamoDB.

### ReUsa Project — UERJ Partnership — Technical Lead

Rio de Janeiro State University (UERJ) · 2020 – 2023

- Led the technical development of an MVP application for management and negotiation of reused water resources.
- Defined the initial architecture, technology stack and development approach, prioritizing speed and flexibility.
- Implemented backend services and data models while coordinating the technical team.
- Ensured documentation quality and executed a structured knowledge transfer during project handover.
- Work with Java, Kotlin and Google Firebase.

### IT Manager / Full-stack Developer (Tech Lead)

Vandal · 2015 – 2021

- Took full ownership of backend systems and infrastructure for a platform in production with thousands of users over several years.
- Designed and implemented a custom logistics and production management module, choosing a bespoke solution to support complex business rules.
- Integrated external services such as payment gateways and shipping providers, handling unstable APIs and outdated documentation.
- Developed integrations with hardware devices (electronic scales via serial communication) to automate operational workflows.
- Managed infrastructure components including Nginx and Elasticsearch, handling production incidents and long-term system maintenance.
- Acted as the primary technical reference, making architectural decisions and continuously improving system reliability.
- Development with Ruby on Rails and MongoDB.

### Backend Developer

Ambiental Engenharia & Consultoria · 2012 – 2013

- Developed and maintained internal backend systems.
- Worked with data management, database maintenance and internal business rules.

### IT Intern / Junior Developer

Responde Ai · 2012

- Contributed to the development of the educational web application.
- Analyzed and helped refactor the database architecture.

## PROFESSIONAL EXPERIENCE — EDUCATION & LEADERSHIP

### Digital Education Teacher & Researcher

Our Lady of Mercy School · 2022 – present

- Teach and research topics related to digital education, programming and applied technology.
- Design workshops and curricular activities focused on computational thinking and real-world applications.
- Conduct Advanced Placement (AP) Computer Science A classes as a College Board certified teacher.
- Bilingual teaching: deliver classes in English.

### Programming Teacher

ORT Tech Institute · 2019 – 2022

- Main teacher for Programming Languages and Advanced Programming Techniques courses.
- Mentored students in software development fundamentals, algorithms and problem-solving.

### Programming Teacher

Andrew's School · 2022 – 2023

- Taught programming fundamentals to high school students, focusing on logic, structure and practical applications.

### Technical Integration Manager

ORT Tech Institute · 2020 – 2022

- Management of all information systems used by the school.
- Contact with potential new partners.

### Programming Instructor

CodeComet · 2020 – 2022

- Teaching programming logic to children and teenagers.

### Educator

Chazit Hanoar Youth Movement · 2011 – 2016

- Planning and delivery of educational activities.
- General secretary at Rio de Janeiro head office (2015).
